

Material Selection Guide

Which insulation material for which application

Material selection guide

The material types commonly used for each application. This is a starting point — contact EIC for product-specific recommendations and available specifications.

Piping

Chilled, hot water and process piping. Pre-formed pipe sections and flexible insulation for line sizes across chilled water, hot water and process services, finished with cladding and sealed joints.

- PUF Pipe Sections
- PIR Pipe Sections
- Rockwool Pipe Sections
- NBR/EPDM Rubber Insulation
- XLPE Insulation
- Aluminium Cladding Sheets

Equipment

Vessels, exchangers and equipment. Slabs and sheets that can be cut and fitted around equipment, fixed with pins or adhesive and protected with cladding.

- PUF Slabs/Sheets
- PIR/PUR Sheets
- Rockwool Slabs
- Insulation Fasteners/Pins
- GI Cladding Sheets

Tanks

Storage and process tanks. Slab and sheet insulation for large flat and curved surfaces, with metal cladding for weather protection.

- PUF Slabs/Sheets
- Rockwool Slabs
- Aluminium Cladding Sheets
- GI Cladding Sheets
- Mastic/Sealant

Ducts

Supply, return and exhaust ducting. Rolls and sheets for duct insulation with foil facing, tape and pins to complete the vapour barrier.

- Glass Wool Rolls
- Rockwool Slabs
- Aluminium Foil
- Insulation Tape
- Insulation Fasteners/Pins

HVAC

HVAC systems. Insulation for chilled water lines, ducts and air handling equipment in commercial and industrial HVAC.

- Glass Wool Rolls
- Glass Wool Pipe Sections
- NBR/EPDM Rubber Insulation
- XLPE Insulation
- Insulation Tape

Refrigeration

Refrigeration and cold lines. Closed-cell insulation for refrigerant and chilled lines where controlling condensation matters.

- NBR/EPDM Rubber Insulation
- PUF Pipe Sections
- Glass Wool Pipe Sections
- Insulation Adhesive
- Insulation Tape

Process Systems

Process plant and hot services. Insulation for higher temperature process piping and equipment, secured with wire and protected with cladding.

- Rockwool Pipe Sections
- PIR Pipe Sections
- Aerogel Insulation
- SS/GI Binding Wire
- GI Cladding Sheets

Industrial Applications

General industrial applications. A complete material set for industrial insulation work, from the insulation itself to supports, fixing and finishing.

- Aerogel Insulation
- Rockwool Slabs
- Pipe Support Inserts
- SS/GI Binding Wire
- Mastic/Sealant
