

Aerogel Insulation

Product information sheet

**EIC-11 · Thermal Insulation**

Aerogel Insulation

Thin flexible aerogel blanket for high-performance industrial insulation.

Material: Aerogel blanket

Primary use: High-performance industrial insulation

Product overview

Aerogel insulation is a flexible blanket in which aerogel is held in a fibrous carrier. It is used for high-performance industrial insulation where space around the pipe or equipment is limited, or where a thin insulation layer is preferred. The blanket is cut, wrapped, secured with wire or tape and clad in the normal way.

Applications

- High-performance industrial insulation
- Space-restricted pipework
- Process equipment

Key features

- Thin flexible blanket format
- Suits space-restricted installations
- Cut and wrapped on site
- Works with standard cladding and finishing
