

Aluminium Cladding Sheets

Product information sheet

**EIC-12 · Cladding & Vapour Protection**

Aluminium Cladding Sheets

Aluminium sheet cladding for weather protection over insulation.

Material: Aluminium

Primary use: Weather protection over insulation

Product overview

Aluminium cladding sheets are the outer metal jacket fitted over pipe, tank and equipment insulation. They protect the insulation from weather, moisture and mechanical damage and give the installation a clean, durable finish. Sheets are rolled or formed to suit the pipe or surface and fixed with screws or bands, with joints sealed where required.

Applications

- Weather protection over insulation
- Pipe jacketing
- Tank and equipment cladding

Key features

- Corrosion-resistant aluminium finish
- Formed to suit pipes, tanks and equipment
- Protects insulation from weather and damage
- Fixed with screws, rivets or bands
