

Glass Wool Pipe Sections

Product information sheet

**EIC-08 · Thermal Insulation**

Glass Wool Pipe Sections

Pre-formed glass wool sections for HVAC and refrigeration piping.

Material: Glass wool

Primary use: HVAC/refrigeration piping

Product overview

Glass wool pipe sections are pre-formed fibrous insulation moulded to fit standard pipe sizes, used on HVAC and refrigeration piping. Sections are typically supplied with a foil facing that acts as a vapour barrier, and are fitted and taped at the joints.

Applications

- HVAC piping
- Refrigeration piping
- Chilled water lines

Key features

- Pre-formed for standard pipe sizes
- Available with foil facing
- Light and quick to fit
- Joints sealed with foil tape
