

Glass Wool Rolls

Product information sheet

**EIC-07 · Thermal Insulation**

Glass Wool Rolls

Flexible glass wool rolls for HVAC ducts and buildings.

Material: Glass wool

Primary use: HVAC ducts and buildings

Product overview

Glass wool rolls are flexible fibrous insulation supplied in roll form, commonly used for HVAC duct wrapping and building thermal and acoustic insulation. Rolls are wrapped around ducts, fixed with pins or adhesive, and the joints sealed with foil tape to complete the vapour barrier.

Applications

- HVAC duct insulation
- Building insulation
- Acoustic insulation

Key features

- Flexible roll format
- Wraps easily around ducts
- Available with foil facing
- Sealed with foil tape
