

NBR EPDM Rubber Insulation

Product information sheet

**EIC-09 · Thermal Insulation**

NBR/EPDM Rubber Insulation

Flexible closed-cell rubber insulation for chilled water and refrigeration lines.

Material: NBR / EPDM elastomeric foam

Primary use: Chilled-water and refrigeration lines

Product overview

NBR/EPDM rubber insulation is a flexible closed-cell elastomeric foam supplied as tubes and sheets. It is a standard choice for chilled water and refrigeration lines because the closed-cell structure helps control condensation on cold surfaces without a separate vapour barrier. Joints and seams are bonded with insulation adhesive.

Applications

- Chilled water lines
- Refrigeration lines
- HVAC piping

Key features

- Flexible closed-cell elastomeric foam
- Available as tubes and sheets
- Fits pipe bends and fittings
- Bonded with insulation adhesive

Available options / specifications

Contact EIC for available specifications. Share your size, thickness and quantity and EIC will confirm the options available for NBR/EPDM Rubber Insulation.
