Pipe Support Inserts

Load-bearing inserts that prevent insulation crushing at pipe supports.

Material: High-density insulation insert

Primary use: Preventing compression at pipe supports

Product overview

Pipe support inserts are load-bearing insulation blocks fitted where an insulated pipe rests on a support, hanger or clamp. They carry the load of the pipe so the surrounding insulation is not compressed, keeping the insulation and vapour barrier intact at support points.

Applications

- Pipe supports and hangers
- Preventing compression of insulation
- Chilled water and process lines

Key features

- Carries pipe load at supports
- Prevents crushing of insulation
- Keeps vapour barrier continuous
- Made to suit pipe size and insulation thickness

Available options / specifications

Contact EIC for available specifications. Share your size, thickness and quantity and EIC will confirm the options available for Pipe Support Inserts.
