

Rockwool Pipe Sections

Product information sheet

**EIC-05 · Thermal Insulation**

Rockwool Pipe Sections

Pre-formed mineral wool sections for high-temperature pipes.

Material: Rockwool (mineral wool)

Primary use: High-temperature pipes

Product overview

Rockwool pipe sections are pre-formed mineral wool insulation moulded to fit standard pipe sizes. Mineral wool is widely used on high-temperature pipework such as steam, hot process lines and boiler connections. Sections are secured with binding wire or bands and protected with metal cladding.

Applications

- High-temperature pipes
- Steam and hot process lines
- Boiler piping

Key features

- Mineral wool construction for hot service
- Pre-formed sections for standard pipe sizes
- Secured with wire or bands
- Finishes with GI or aluminium cladding

Available options / specifications
