

SS/GI Binding Wire

Product information sheet

EIC-17 · Installation & Accessories

SS/GI Binding Wire

Stainless steel and galvanised binding wire for securing insulation.

Material: Stainless steel / galvanised wire

Primary use: Securing insulation

Product overview

SS/GI binding wire is used to secure pipe sections, slabs and blankets in place before cladding is fitted. Stainless steel wire is selected where corrosion resistance or higher temperatures require it; galvanised wire is used for general insulation work.

Applications

- Securing pipe sections
- Securing slabs and blankets
- Wire mesh fixing

Key features

- Stainless steel and galvanised options
- Secures sections, slabs and blankets
- Used before cladding is fitted
- Supplied in coils
